OLE MISS TO HOLD SESSION IN FRANCE

Encouraged by the success of the first summer session in France, the last summer in Aubigny, the Department of Modern Languages of the University of Mississippi, in cooperation with the University Extension, has already completed plans for the second Summer Session, to be held in the same town in South Central France from the middle of June to the last week in August.

The group will leave New York June 3, arriving at Le Havre June 10, then go by boat train to Paris. The next five days will be spent seeing Paris by day and by night. Included in their tour will be Fontainebleau, Chartres, and the world-famous cathedral of Amiens. On June 16, they will travel by bus through Gien, on the Loire thence to Aubigny, where serious work will begin.

For the next six weeks students will engage in intensive study of the French language and listen to lectures on French Civilization, French Artistic and Archaeological Treasures by outstanding French professors. They will visit the Museum at Bourges to work in the famous School of Fine Arts and will see many places of interest in the vicinity. As a phase of their course, students will visit the artists' colony at La Borne and go through the famous glazed-ware tours. On a two-day excursion, they will visit the world famous Abbey de Vézelay and travel along the picturesque Nivernais region of the Loire. On another excursion, they will visit the Chateau de Sully, the Abbaye de Saint Benoit, and the Orleans-Montargis region, where they will be given a reception by the Mayor of Orleans.

Scheduled for other weekend excursions are trips to Aubusson—famous

for its tapestries, to Vierzon and to Limoges, where some of the finest porcelain is made. On another week-end, they will visit Vichy and the magnificent scenic Massif Central Region, famous for its forests, by the Mayor and other dignitaries of Vichy. The group will also enjoy excursions to Chambord, Cheverny, Blois, Chateau, Amboise and Chenonceaux.

As in the summer of 1933, students will live and take their meals in the three-story Villa Marguerite, a famous old landmark of the 16th century. During the course of their stay in Aubigny, students will again be invited frequently to dine in the homes of leading citizens. At all meals, only French will be spoken. Such visits to private homes will enable them to get acquainted with the French people in their everyday lives and to learn to speak French fluently. Afternoons will be spent in swimming, playing tennis, fishing or bicycling, or in hikes about the beautiful country side.

The group will leave Aubigny, July 31, by bus for Bourges and Clermont-Ferrand, in the Massif-Central region. During the next two weeks, they will enjoy a variety of sight-seeing, en route to Paris. They will visit Avignon and Arles on the way to the French Riviera, winding their way leisurely through Aix-les-Bains, St. Raphael, and Cannes. They will see the beautiful Gorges du Loup and visit the perfume factories at Grasse.

From Nice they will travel by private bus along the Route Napoleon, through the Lower Alps, to Digne and Grenoble, one of the most beautiful cities in France.

After a night at Dijon, they will travel to Paris via Montbard and Tonnerre, arriving in Paris August 11. Here, for the next eight days, students will have wonderful opportunity for shopping, browsing, and practicing their

MARY ACREE LANIUS DIES DECEMBER 23

Mary Acree Lanus, widow of the late Holmes Lanus, of Ramoneda Court, Bay St. Louis, died December 23, 1938, at her home at 1:00 a.m. Funeral arrangements were handled by Fahey Funeral Service. Religious rites were administered by the Rev. Charles Johnson, rector of Christ Episcopal Church, at 3 p.m. Wednesday at a private funeral.

Interment was in Live Oak Cemetery, Pass Christian. The deceased is survived by her mother, Mrs. R. Acree, and was a native of Jackson.

KITTY VAUGHAN DIES IN TEXAS

Kitty Anderson Vaughan died Dec. 19, 1938, in St. Joseph's Hospital in Bayou Texas.

The deceased was a retired school teacher and had taught in Jackson and Clinton and several other Mississippi schools.

Daughter of the late Kate Durham and W. C. Anderson of Poplarville, she was born March 21, 1885.

Funeral services were held Dec. 23 at 9 a. m. from Lakeside Funeral Home. Interment was in the Murphy plot in the cemetery.

MID TERM CANDIDATES FOR DEGREES

Approximately 117 students are expected to complete the requirements for degrees at Mississippi State College by the end of the Fall semester January 23. Dr. T. K. Martin, registrar, has announced.

One Hundred thirty of these candidates for the bachelor's degree, and 17 for the master's degree. No ceremony will be held at the mid-term, but these honorary graduates will be eligible to receive their diplomas with the spring graduates on May 21.

French. On August 19, they take ship at Le Havre for New York, arriving in the U.S. August 25.

For seventy days in France, two weeks in Paris, one week on the Riviera, five week-end excursions in scenic South Central France, and all expenses, from New York to France and return—the cost per student is only \$995.

DR. PLUNKETT DIES SAT., DECEMBER 26

Dr. Randolph S. Plunkett of Picayune, former Bay St. Louis resident, died at Touro Infirmary in New Orleans, Sunday, Dec. 26, 1938, at 2 p. m.

The deceased, who is survived by his wife, Mrs. Lillian Rouff Plunkett, is also survived by two daughters, Leon Morris of Harahan, La., and Mrs. Alan Vainn of New Orleans, one son, Joseph H. Plunkett of New Orleans and Bay St. Louis, and two stepdaughters, Miss Margaret Guiterrez, and Mrs. R. E. Siegfried of Chicago, Ill.; also he is survived by six grandchildren.

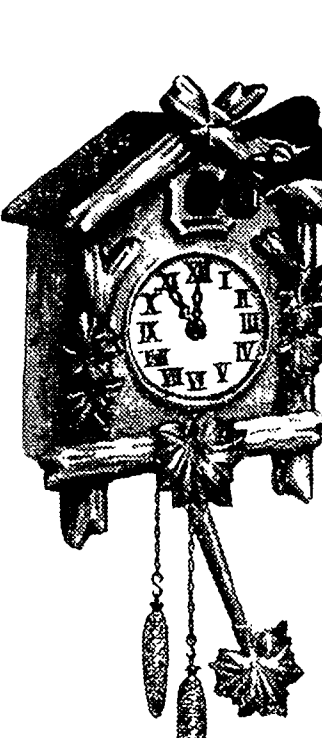

Funeral services were held Monday, Dec. 28, at 11 a. m. from the Chapel of McDonald's Funeral Home in Picayune. Interment was in Southern Memorial Cemetery in Biloxi.

Birthday Party

Fifty children were invited by Mr. and Mrs. Russell Elliott to help celebrate the birthday of their young son, Russell, better known to his playmates as "Ree," on Sunday afternoon at the Youth Center.

Ree was four years old, and the children present were of that age group. Games were played by the little people, and a large birthday cake iced in white and trimmed with silver and green held lighted birthday candles. Ice cream, candies and petit fours were also served the guests.

Shelby Tucker Jr., a student of Yale University, New Haven, Conn., is spending the holiday season with his father, Shelby Tucker Sr., and Mrs. Tucker at their Pass Christian home. During his vacation, Shelby spent some time with the Donald Coles and their son, Penny, at their N. Beach home.

Happy New Year

May your New Year be filled with laughter that is joy, the mellowness of friendship and the satisfaction of accomplishment rewarded.

Little Theatre To Hold Business Meeting

The Bay St. Louis Little Theatre will hold their annual business meeting Wednesday evening, January 6, at 8 p.m. at the Playhouse on Boardman Ave.

Features of the evening will be the awarding of Oscars for the best performances and direction of the year, election of officers for the 1934 theatre season, and presentation of business of the theatre to the patrons for the year 1933.

Mr. and Mrs. Hugh Kiefer and their three sons of Norco, La. are spending the holiday season in Bay St. Louis. Charles Kiefer of New Orleans also spent several days in Bay St. Louis.

Egg-nogg Party

Mr. and Mrs. C. D. Kiefer at an egg-nogg party at their home at 5 to 8. Guests of honor were the party was given by the daughter and her husband, Mr. and Mrs. Wm. B. McMillan of Chattanooga, who are spending the season with their parents, Mr. and Mrs. J. B. Kiefer.

Guests also were guests of the honorees, and a few intimates of the hosts.

The house was artistically decorated in the Christmas motif. Mr. and Mrs. Kiefer received their guests in a charming hostess room. Several friends of the hosts alternated serving, and an exquisite silver punch bowl

Career Opportunity in State Oil Industry

FOUND BY MISSISSIPPIAN HERSCHEL E. LANE

Year's Training With Gulf Refining Company Prepares State College Graduate For Petroleum Engineer's Job

Herschel E. Lane is a husky six-footer out of Lawrence County, Mississippi. He's going to be a petroleum engineer. This is a job which carries a lot of responsibility, so the 32-year-old war veteran will have to absorb some more learning even though he holds the degree of Master of Science in mechanical engineering from Mississippi State College.

After he left State College in 1931, Lane looked around—in the Carolinas and the far west—for a while before he found a career opportunity right on his doorstep. This job of petroleum engineering can take Mr. Lane right up the success ladder, if he's got what it takes. Many of the top officials of oil companies

started with a shovel in their hands.

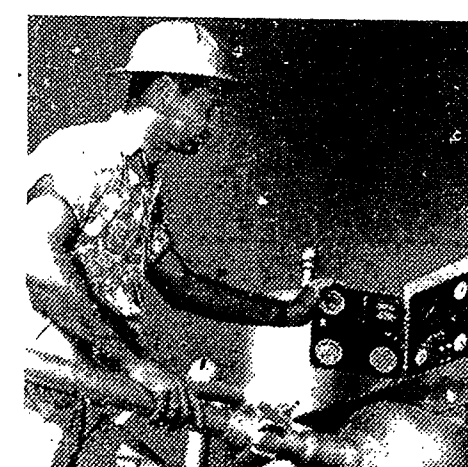

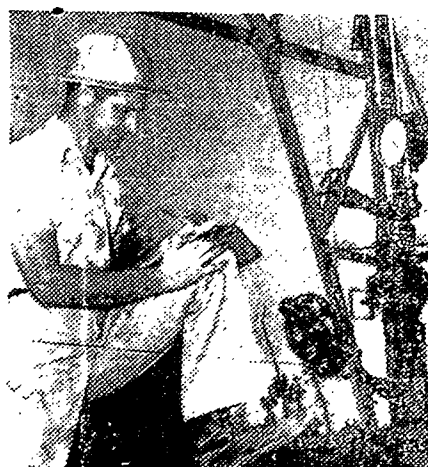

The Gulf Refining Company, one of Mississippi's largest producers of crude oil, is always looking among its Mississippi employees for young people with a future. When you have thousands of other folks' dollars riding on your decisions, you've got to have experience and know-how. The supervisors at Gulf figure Herschel Lane has a good educational foundation for the work before him; has a willingness and ability to learn, to work as a member of a team and to accept responsibility. Gulf put this Mississippian on its payroll and taught him for a year on company time. Gulf needs good petroleum engineers, so Lane started with a shovel in his hand.

Herschel E. Lane began his year's training for the job of Petroleum Engineer with the Gulf Refining Company as a "roustabout" or general laborer. Here he is helping to install a pumping unit on an oil well in the Heidelberg field, Jasper County.

From the chores of a "roustabout," trainee Lane advances to well-maintenance work—a field in which his responsibility will be great when he is a full-fledged petroleum engineer. Lane records a reading (first picture at right) while taking a bottom-hole pressure in a flowing oil well after he and other members of the maintenance crew have lowered a special gauge into the hole. (Center right) Lane inspects the operation of a "separator" which checks the "Christmas tree" of a nearby gas-distillate well. The separator takes distillate-bearing gas from the well and separates the dry gas from the liquid hydrocarbons, measures it and passes it along to a transmission pipe line for transportation to the point of use.

After six months of construction and maintenance work, Lane enters Gulf Refining Company's modern core analysis laboratory at Laurel. Experienced technicians guide neophyte Lane through the various tests performed on rock samples by the laboratory to determine permeability of a well, to determine the nature of a reservoir, and to aid in the drilling of other wells in the area. Here (far right), he measures the permeability of a rock sample taken from deep in the earth as technician Willodean McBride records the reading.

From the core analysis laboratory, Lane enters Gulf's engineering office in an adjoining building in the heart of Laurel, Mississippi. As he takes up his slide rule to compute a pressure problem for a gas field gathering system, Lane recalls his days in mathematics class at Mississippi State College.

Training in the administrative procedures of the Gulf Refining Company's production division is also given the Mississippian in the Laurel Headquarters building. In this phase of his education for the job of petroleum engineer, Lane learns the "how" and the "why" of executing the paperwork which keeps Gulf's organization working efficiently. At the purchasing desk (above right), D. S. Keveryn instructs the Lawrence Countian in the proper

accomplishment of a field work order—a form on which Lane will rely heavily in his future work.

Back in the field for his final training, Herschel E. Lane studies the operation of a drilling "rig"—the derrick, machinery and equipment used to drill for oil and gas. As a petroleum engineer, Lane will often bear the responsibility of completing all types of wells—installing production equipment such as pumping units and "Christmas trees," engineering gathering systems, and supervising maintenance work. Lane consults (right) with T. I. Hartzo, "tool-pusher" or drilling foreman for the drilling contractor, and W. I. Taylor of Gulf at the rig which will drill more than two miles into Jones County rock in an attempt to confirm Gulf's recent discovery of the state's deepest commercial oil production.
